

平成27年度第8回情報数理学セミナー

日時：平成27年7月9日（木） 13:00～14:30

場所：大阪大学 吹田キャンパス 情報科学研究科A棟 A109室

講師：Andrew L Johnson 情報科学研究科 特任准教授

講演題目：Research topics in industrial engineering and operations research

アブストラクト：

I will discuss the research topics covered in industrial engineering and operations research programs in the U.S. and opportunities for international students to get involved with research activities. Research activities in the college of engineering cover a wide array of issues from applied to theoretical topics. Students at all levels are able to get involved with research and play different roles in the process. My talk will outline my experiences and knowledge of opportunities at Texas A&M and at other universities in the U.S.

Brief Bio:

Andrew L Johnson is an Associate Professor and co-director of the Laboratory for Energy-Sustainable Operations in the Department of Industrial and Systems Engineering at Texas A&M University. He obtained his B.S. in Industrial and Systems Engineering from Virginia Tech and his M.S. and Ph.D. from the H. Milton Stewart School of Industrial and Systems Engineering at Georgia Tech. His research interests include productivity and efficiency measurement, benchmarking, and mechanism design. He has worked on research problems in a variety of industries including healthcare, energy, manufacturing and logistics. He is an associate editor of IIE Transactions and a member of the IIE, INFORMS, National Eagle Scout Association, and German Club of Virginia Tech.
